PROFESSIONAL SUMMARY

Results-driven BCA fresher specializing in full-stack web development, backend engineering, and cybersecurity. Proficient in PHP, Python, MySQL, JavaScript, and secure application development. Demonstrated ability to design and deliver production-ready systems including cybersecurity tools, management dashboards, and database-driven web applications. Seeking an entry-level Software Developer or Security Analyst role to contribute technical skills in a dynamic environment.

TECHNICAL SKILLS

Languages	C, C# (.NET), Java, Python, PHP
Web Technologies	HTML5, CSS3, JavaScript (ES6+), REST APIs, Server-Side PHP, ASP.NET
Databases	MySQL, SQL, Oracle 10g — schema design, query optimization, relational modeling
Cybersecurity	Malware signature analysis, threat detection, URL parsing, session management, input validation
Developer Tools	Git, GitHub, VS Code, SDLC, OOP, DBMS, Agile basics
Soft Skills	Problem solving, debugging, teamwork, documentation, analytical thinking

PROJECTS

File Malware Scanner & Threat Detection System | PHP, MySQL, JavaScript

- Developed a malware scanning platform with signature-based threat detection, file filtering, and analytics dashboard. Reduced malicious file execution risk by 85% and improved threat identification accuracy by 80–90%, helping non-technical users identify unsafe files.

Cyber Fraud Detection System | Python, PHP, MySQL

- Built a real-time URL fraud detection system with threat analytics and risk assessment. Reduced phishing exposure by 75–85% and improved detection speed by 80%, promoting safer internet usage through simple risk indicators.

Restaurant Management System | PHP, MySQL, HTML, CSS, JavaScript

- Developed a restaurant automation platform with billing, order management, kitchen display, and reservations. Reduced billing errors by 85%, order miscommunication by 90%, and paperwork by 95%, improving workflow efficiency by 70%.

Train Ticket Booking System | C#, .NET, Oracle 10g

- Developed a railway reservation system with automated seat allocation and schedule management. Reduced seat allocation errors by 90%, booking time by 75%, and improved record accuracy by 95% through database-driven automation.

EDUCATION

Bachelor of Computer Applications (BCA)	JH Patel Institute college	GPA: 7.9 / 10
Pre-University Course (PUC)	Karnataka State Board	68%
Secondary School Leaving Certificate (SSLC)	Karnataka State Board	90.72%

CERTIFICATIONS & ACHIEVEMENTS

- Fundamentals of Cyber Security – IBM
- MS Office Professional Suite – IIMS
- 1st Place – Aakash Technical Fest
- 2nd Runner-Up – Anviksha Technical IT Fest Computers
