

PORTFOLIO WEBSITE PROJECT DOCUMENT

Project Title:

Personal Portfolio Website for **Shivaraja J**

1. Project Overview

The Personal Portfolio Website is a responsive web application designed to showcase the skills, projects, education, achievements, and professional profile of Shivaraja J. The website will serve as an online resume and personal brand platform, allowing recruiters and employers to evaluate technical abilities and project experience.

2. Objective

- To establish an online professional presence.
- To showcase technical skills and projects.
- To provide recruiters with easy access to contact information.
- To improve employability in the software industry.
- To demonstrate web development skills through a real-world project.

3. Target Audience

- Software recruiters
- Hiring managers
- Internship providers
- Potential clients
- Fellow developers

4. Scope of the Project

The website will include:

- Home Page
- About Me Section
- Skills Section
- Projects Showcase
- Education Details
- Resume Download
- Contact Form
- Social Media Links
- Responsive Design for Mobile and Desktop

5. Technologies to be Used

Frontend:

- HTML5
- CSS3
- JavaScript

Optional:

- PHP
- MySQL
- Bootstrap
- Git & GitHub

Hosting:

- GitHub Pages or Netlify

6. Functional Requirements

FR1: Display personal information.

FR2: Display educational qualifications.

FR3: Display technical skills.

FR4: Display project details.

FR5: Allow resume download.

FR6: Provide contact information.

FR7: Support mobile and desktop devices.

7. Non-Functional Requirements

- Fast loading speed
- Responsive design
- Easy navigation
- Modern UI
- Cross-browser compatibility
- Secure contact form

8. Expected Outcome

A professional portfolio website that effectively represents Shivaraja J's technical profile and increases visibility to recruiters and employers.

9. Future Enhancements

- Blog section
- Project filtering
- Dark mode
- Admin dashboard
- Visitor analytics
- AI chatbot assistant
